“Leaders in Cleanroom Design & Construction”

Asgard Cleanroom Solutions is a progressive cleanroom / controlled environment design and construction company established in 2000. We are the leader in Modular Cleanroom Design for the Biopharmaceutical Sector, Micro Electronics, Semiconductor and Battery Manufacturing facilities. Our primary focus is on the design, manufacture, and construction of cGMP (GxP) controlled environments. We design and develop cleanrooms to ISO 5-8 and BSL 1-4. All our designs are developed in Revit from LOD 100 to 500 inclusive of COBie asset management data for client’s operation and maintenance manuals. We work in partnership with architectural engineering houses, main contractors (EPCMV Contractors) and End Users to build a long-term working relationship. We understand the need for compliance and adhere to the highest regulated standards from the European Medicines Agency (EMA), ISO and FDA. The success of Asgard has been underpinned with a total commitment to health & safety, quality, and the environment. We are accredited under ISO 9001:2015 and ISO 45001:2018.

Cleanroom Design

Asgard's team of expert designers provide the most advanced 3D BIM modeling packages and systems available in the market. Over the years we have built a reputation for providing design expertise and are renowned in the industry for continuously improving and expanding.

We have demonstrated success across a variety of projects, from turn-key design and build, to design-assist, to plans & specs. No matter your project approach, Asgard has the solution.

Design and BIM Modelling Tools

All our BIM capabilities reside in-house, and all our modelling is performed by our own design team made up of industry veterans in cleanroom engineering, design and construction. By leveraging latest technology with our in-house expertise, we deliver better designs faster and have fewer issues in the field. We design and develop models up to LOD 5.

Our hardware and software portfolio for BIM modelling is based on industry standards and client compatibility. Current platforms include Revit, NavisWorks, AutoCAD MEP, TSI (CADMech and CADDuct) and PDS.

Cleanroom Construction

Asgard is a recognised leader in Cleanroom Construction in Europe. It has a solid base of repeat clients, broad industry references and a solid track record of completing projects safely, on time, to budget and to our client's demanding quality surpassing performance targets.

- › We have skilled in-house project and construction management professionals, each with more than a decade of experience.
- › We provide rapid resolution response through our extensive field knowledge, proven clean build methodologies, and engaged, hands-on approach.
- › Accomplished at constructing new greenfield projects, retrofitting existing facilities and cleanroom renovation upgrade projects.

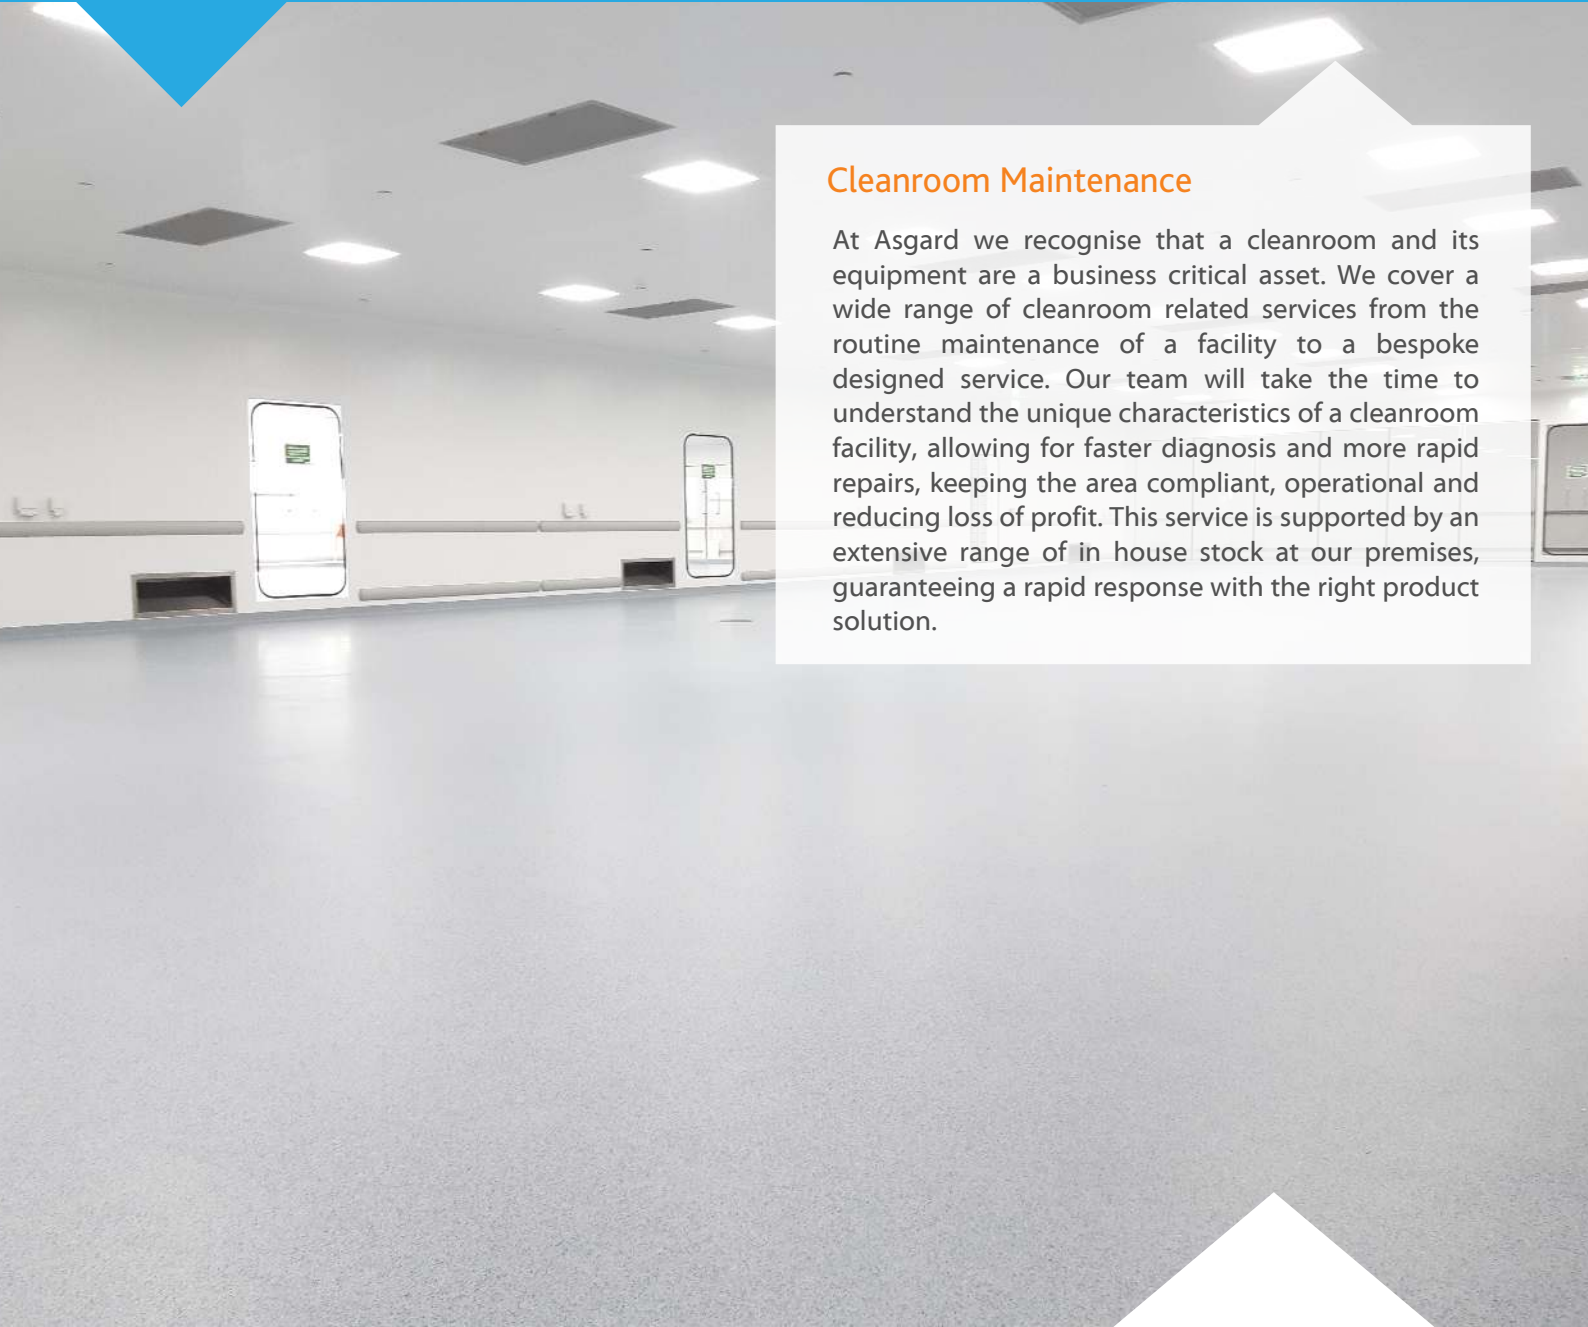

At our core we are a cleanroom design/build general contractor. Our expertise enables us to be either the general contractor or “clean” subcontractor depending on the needs of our client.

Construction Leadership

Construction Management – At Asgard our skilled construction managers are responsible for quality, craftsmanship, clean build protocol, and safety. Each Construction Manager is equipped with wireless tablets that contain drawings, specifications, submittals, and 3D BIM models for all projects. This commitment to technology addresses issues in the field in real time, with the confidence of our complete team backing them up.

Project Management – Asgard's Project Managers have decades of construction experience under their belt. They are empowered with the best tools, latest training, proper support staff, and the complete backing of our management team to drive projects and achieve success.

Cleanroom Maintenance

At Asgard we recognise that a cleanroom and its equipment are a business critical asset. We cover a wide range of cleanroom related services from the routine maintenance of a facility to a bespoke designed service. Our team will take the time to understand the unique characteristics of a cleanroom facility, allowing for faster diagnosis and more rapid repairs, keeping the area compliant, operational and reducing loss of profit. This service is supported by an extensive range of in house stock at our premises, guaranteeing a rapid response with the right product solution.

Upgrading your Cleanroom

At Asgard we have the latest methodologies and equipment which means we can carry out our services more efficiently and to a higher standard than our competitors saving our clients time and money. We operate to ISO 9001 2015 Quality Standard and we are totally committed to the principles and practice of Occupational Health & Safety having attained OHSAS 45001 Accreditation {NSAI} for our Safety Management System.

OUR CLIENTS

▶ Trusted by the best companies...

Asgard has supplied some of the world's leading biopharmaceutical and pharmaceutical companies, both in Ireland and internationally, such as Amgen, Eli Lilly, Ipsen, Merck Sharp & Dohme, Pfizer, Regeneron & Zimmer.

.... the leader in Cleanroom Design and Construction for the Biopharma Sector, building over 100,000 square metres of Cleanroom space since 2015 YTD.
